Amoxicillin	500mg	Twice daily	7 days
Acetaminophen	500mg	As needed	For fever
Loratadine	10mg	Once daily	5 days

💬 Doctor's Notes**SM** Dr. Sarah Miller • March 15, 2025

Patient presents with typical symptoms of an upper respiratory infection. No signs of pneumonia or other complications. Prescribed antibiotics as a precaution due to patient's history. Follow-up appointment scheduled for March 22. Patient advised to return sooner if symptoms worsen or fail to improve within 48 hours.
